

ARUN KUMAR PANDEY

DevOps Lead

pandeyarun0600@gmail.com · +91 9005760620 · GitHub · Greater Noida

SUMMARY

DevOps Engineer with practical experience in CI/CD pipelines, Docker-based containerization, cloud services, and infrastructure automation. I focus on creating stable deployment processes and supporting development teams in maintaining reliable systems.

EXPERIENCE

DevOps Lead

Corporate Cruise

01/2025 – Present

Greater Noida, Uttar Pradesh

- Built CI/CD pipelines reducing deployment time by 60%.
- Containerized 5+ services using Docker and automated build workflows via GitHub Actions, reducing manual intervention by 40%.
- Implemented IaC (Terraform), reducing environment provisioning time and eliminating configuration issues.
- Deployed centralized monitoring and logging (Prometheus + ELK), improving incident visibility and reducing debugging time.

Intern

Mindler

01/2022 – 02/2022

New Delhi, India

- Supported processing of 10,000+ student assessment records, ensuring accurate data flow for analytics.
- Streamlined communication workflows, reducing manual coordination effort for career coaches by 20%.

PROJECTS

CodeSpace (CoSpaces)

- Integrated Razorpay with webhook automation improving payment success rate by 20% and reducing payment retries..
- Implemented DID-based verification reducing onboarding fraud cases and lowering verification time.
- Led retailer onboarding, achieving a 27% participation rate during pilot and improving platform adoption.
- *Tech:* React, Next.js, MongoDB, Terraform, GCP, SonarQube.

High On Food

- Increased partner onboarding by 50% during the pilot phase, accelerating early traction for the platform.
- Built CI/CD pipelines (Docker + GitHub Actions) improving reliability while handling complex workflows.
- Developed Mapbox-based location search and partner dashboards, cutting onboarding time for restaurants significantly.
- *Tech:* React, Next.js, NestJS, Docker, GCP, Mapbox.

EDUCATION

Bachelor of Technology (Computer Science)

Bennett University, Greater Noida

2023 – 2027

Coursework: DSA, Operating Systems, DBMS, Computer Networks, Cloud Computing, DevOps, Distributed Systems

Board of Secondary Education

Seth M.R. Jaipuria School

2009 – 2022

KEY ACHIEVEMENTS

- Solved 300+ Data Structures and Algorithms problems across LeetCode and GFG
- Designed CI/CD workflows that improved deployment speed by 40% and enhanced release reliability for the CoSpaces project.
- Coordinated DevOps operations at Corporate Cruise, coordinating deployments, IaC workflows, and CI/CD initiatives across teams..
- Set up versioned deployment artifacts enabling reliable rollbacks, reducing recovery time during failed deployments by 35%.

SKILLS

Languages: C++, Java, Python, JavaScript

Developer Tools: Terraform, GitHub Actions, Docker, Docker Compose, Jenkins, Azure DevOps, Linux Administration, Shell Scripting, Nginx, AWS, Infrastructure as Code, Hostinger, Render, MongoDB Atlas

Frameworks: Node.js, Express.js, React.js, Next.js, NestJS

Cloud / Databases: Microsoft Azure, Amazon Web Services (AWS), MongoDB, Redis

Soft Skills: • Collaborated cross-functionally with backend and product teams • Mentored junior developers • Communication • Led deployment coordination with stakeholders • Improved communication loops between teams • Integrated Agile development workflow

CERTIFICATIONS

- Databases and SQL for Data Science With Python (Coursera)
- Introduction to DevOps (Coursera/IBM)
- Terraform for Beginners (Coursera)
- Docker for Beginners (Coursera)
- Linux: Introduction to Shell Scripting for DevOps
- Linux: Processes and System Resource Management for DevOps
- Data Structures
